

# truss junctions

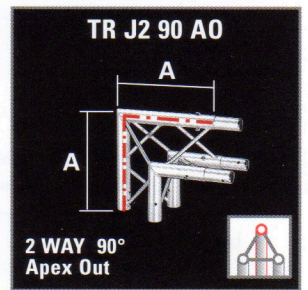

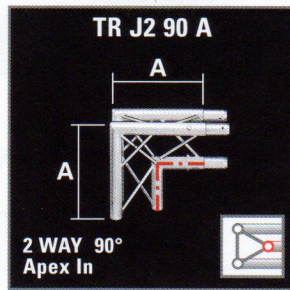

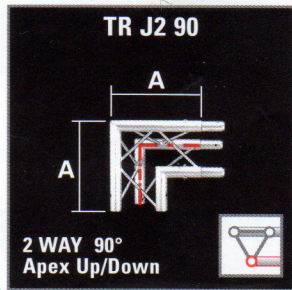

All junction configurations featured are available in both OPTI Trilite 100 and 200 formats. Refer to dimensional information for appropriate junction geometry. The apex tube of each junction is indicated by a red line and orientation diagram. For weight details see page 10. For additional information contact OPTI.

## 2 way

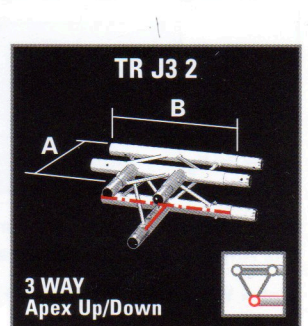

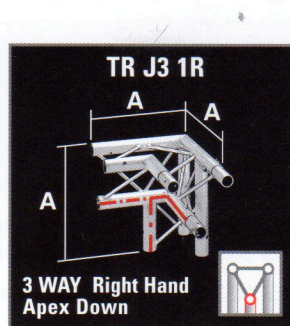

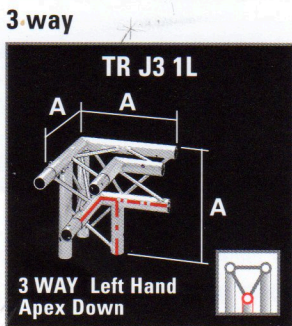

### [OPTI]™ Trilite 100

**A = 400mm**  
**B = 625mm**  
**C = 600mm**

### [OPTI]™ Trilite 200

**A = 400mm**  
**B = 550mm**  
**C = 800mm**

### Product Codes

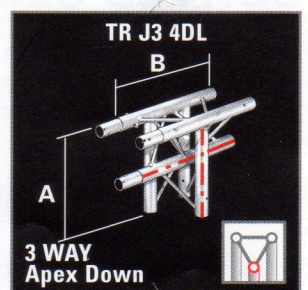

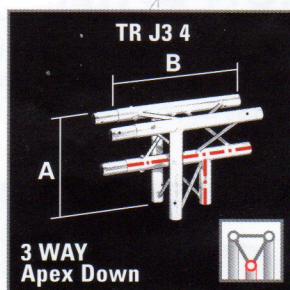

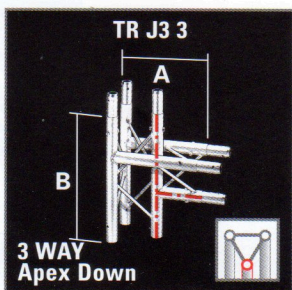

When ordering junctions, product codes must be prefixed by 1 (100) or 2 (200), e.g:

for OPTI Trilite 100 specify

**1 TR J2 45**

for OPTI Trilite 200 specify

**2 TR J2 45**

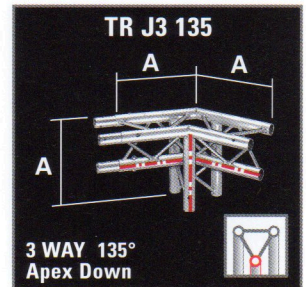

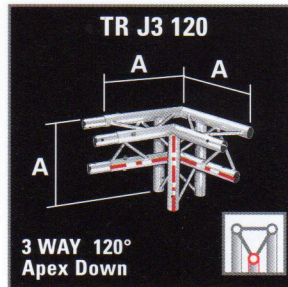

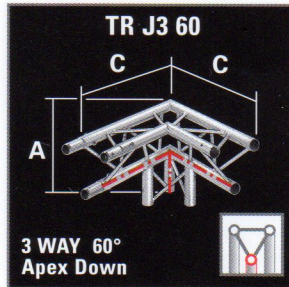

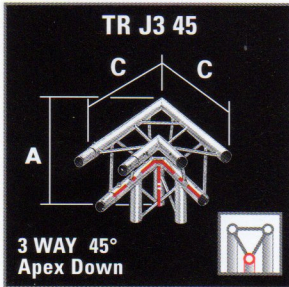

# truss junctions

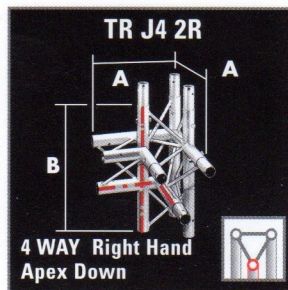

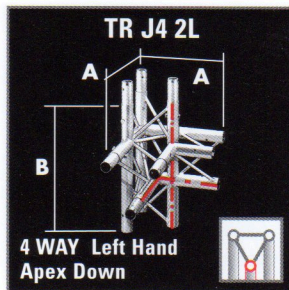

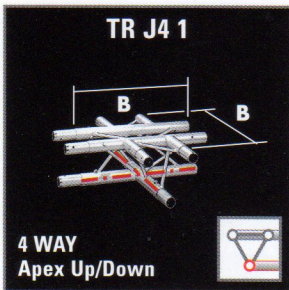

Use 60° to create equilateral triangles, 90° for Rectangles and Squares, 120° for Hexagons and, 135° for Octagons.

Special junctions can easily be produced to suit specific applications. Contact the *DesignLine* Service to discuss your custom requirements.

## 3 way

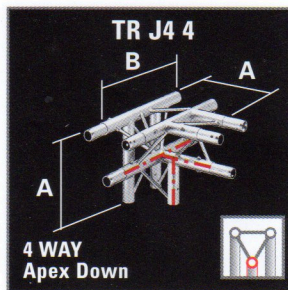

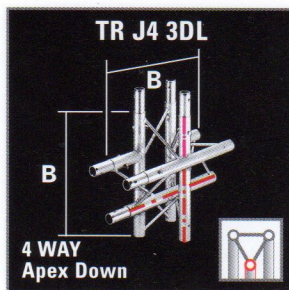

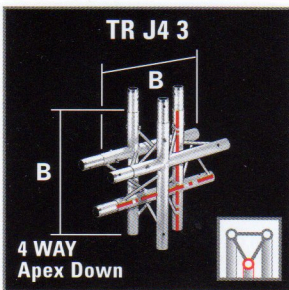

## 4 way

**[OPTI]™ Trilite 100**

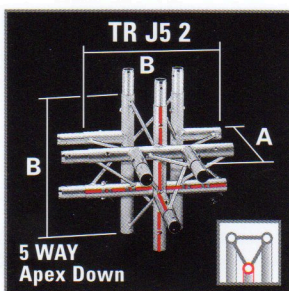

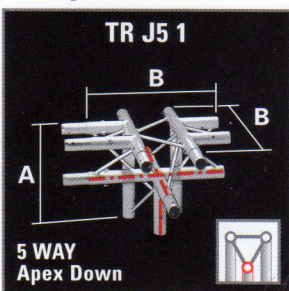

**A = 400mm**  
**B = 625mm**  
**C = 600mm**

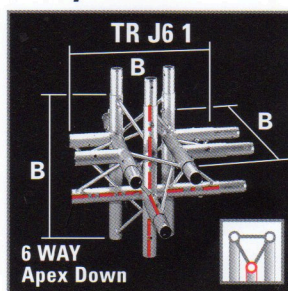

**[OPTI]™ Trilite 200**

**A = 400mm**  
**B = 550mm**  
**C = 800mm**

## 5 way

## 6 way

## Product Codes

When ordering junctions, product codes must be prefixed by 1 (100) or 2 (200), e.g:

for OPTI Trilite 100 specify  
**1 TR J2 45**

for OPTI Trilite 200 specify  
**2 TR J2 45**
